ABOUT

As scrutiny of U.S. climate funding intensifies, only the most commercially viable projects will succeed. Technologies seeking to scale up and have real-world impact past the demo stage, must be cost-competitive, energy-efficient and have a robust business model that can withstand policy and economic headwinds.

Decarb TechInvest North America 2025 is where the full value chain comes together to discuss how this is possible despite the challenging investment environment. Here you'll meet with Series B+ founders, investors, industrials, and policy leaders all focussed on accelerating the scale-up of hardware technologies to reduce emissions and protect margins in hard-to-abate sectors.

Now, more than ever, it's critical to benchmark your strategy, identify technologies that deliver measurable carbon and cost savings, and align with capital that supports execution. Industrials in our Decarbonization Leaders Network (DLN) clearly state that their commitment to decarbonization has not wavered, despite how the goal posts have shifted.

Whether you're a tech founder navigating the next scale-up, an investor targeting capital-efficient growth, or an industrial seeking validated scalable tech solutions - **this is the event to make quality connections that can have real impact.**

What you can expect...

Industrials share how their tech roadmaps have evolved and what they look for in hardware solutions – from energy balance to scalability. Hear from perspectives from companies including **CRH and Evonik**

Founders of tech companies from pre-series A to series C+ will share their insights into common denominators of success (and failures) at different stage of the scale up journey. Hear from **Electric Hydrogen, Electra, Verdox, Via Separations** and **Sublime Systems**

Case studies and expert panels unpack the financing, risk-sharing, and structuring approaches that are helping FOAK projects cross the line - and what's still holding others back. Hear from **IFM Investors, Precursor and V1 Climate Solutions**

De-risking tech and implementing strategies for bankability at scale: From FOAK pilots to full project portfolios, tech leaders and investors must navigate a shifting risk landscape. Hear from **Antin Partners, Khasma Capital and Fervo Energy** on overcoming those challenges

Join technology focussed round tables that will interrogate different solutions and assess their market potential, resilience and cost-effectiveness. Leaders include CEOs from **Capture6, Phoenix Tailings** and **Utility Global**

Connecting at this event has reinforced to me the power of collaboration to drive meaningful change. The insights and knowledge shared during the event will inform our strategies moving forward."

David Perkins
SVP Sustainability and Public Affairs
HEIDELBERG MATERIALS

I particularly appreciated the strong strategic focus - understanding how major asset owners are engaging with both emerging and established technologies is crucial for investors and entrepreneurs alike."

Main Conference Agenda: Day One

TUESDAY SEPTEMBER 9TH

8:00 - 8:40AM

Registration and Networking

Get your badge early, enjoy a light breakfast, and make your first valuable connections of the day.

8:40 - 8:45AM

Decarb Connect Welcome

Melissa Chew
VP Product
DECARB CONNECT

8:45 - 8:55AM

Chair's Opening Remarks

8:55 - 9:10AM

Opening Fireside Chat: U.S. Climate Policy – What Tech and Investors Need to Know

- How U.S. climate policy is evolving and what that means for commercialization, project deployment, and long-term competitiveness
- Which policy signals tech developers and investors should watch out for amid federal budget tightening and shifting priorities
- Key regulatory and permitting trends that will shape industrial decarbonization strategies over the next 12–18 month

Richard W. Corey
Partner
AJW, Inc.

Galen Nelson
Chief Commercial Officer
MASSACHUSETTS CLEAN ENERGY CENTER

9:10 - 9:50AM

Headline Industrials Panel: What's Driving Technology Choices and Collaboration in Energy-Intensive Industries?

- Weighing up regulatory pressures, the current trade environment, and shifting priorities to shape decision making
- Real-time insights - What decarbonization pathways and technologies are industrials considering, pursuing or re-evaluating?
- At what stage do industrials pursue collaborations with startups to co-develop and validate solutions?
- How do you identify technologies with a clear path to commercial viability and scale?

Anil Saxena
Vice President RD&I
EVONIK

David Bangma
Head of Innovation
CRH

9:50 - 10:05AM

Fireside Chat: Decarbonizing Hard-to-Abate Sectors with Economic Clean H2 Production

Parker Meeks
CEO
UTILITY GLOBAL

Rick Breunese
Senior Advisor
SYMBIO

10:05 - 10:45AM

Signals from the Market: What Climate Tech Investors Are Prioritizing in 2025

- How are shifting policies and tariff regimes impacting investment decisions?
- How are CVCs aligning strategic investment opportunities with corporate priorities amid market uncertainty?
- What investors look for in tech founders and business models now versus 2 years ago?
- What technologies or projects will be least impacted by regulatory uncertainty?
- How is uncertainty impacting regional strategy? How do other global markets factor in?

Panellists:

Frank O'Sullivan
Managing Director
S2G VENTURES

Christina Chang
Advisor
LOWERCARBON CAPITAL

Tibor Toth
Senior Investment Director
ARAMCO VENTURES

Wim Reyntiens
Co-Founding Partner
RE:WIRE VENTURES

10:45 - 11:30AM

Networking Break – including speed networking

- Informally connect with fellow attendees
- Prebook 1:1 meetings on the app
- Join the speed networking

11:30 - 11:45AM

Fireside Chat: Inside the Capital Journey – Lessons from the Trenches of Early-Stage Industrial Growth

- Real-world lessons from scaling early-stage companies, including how capital is sourced, structured, and deployed in practice
- A candid look at the day-to-day execution challenges and how teams push through
- A framework for sequencing operations and capital raising - what must come first, what can run in parallel, and how to avoid missteps
- What founders and capital partners can learn from each other with insights drawn from multiple ventures across the industrial decarbonization space

Panellist:

Brian Begley
Partner
PHICAP ADVISORS

Ethan Cohen-Cole
Co-Founder and CEO
CAPTURE6

11:45 - 12:25PM

Charting the Scale-up Journey Part 1: Early stage to Series A – From Lab to First Pilot

Throughout the event we will chart the journey of tech companies at different funding stages, with a focus on how they see the road ahead, who are the funders, what investment structures look like and what do they see as the main challenges.

- Overcoming first-of-a-kind challenges at the early stage
- Securing catalytic early funding
- Building credibility with strategic partners
- Planning ahead to secure offtake agreements

Friedrich von Gottberg
CEO

Main Conference Agenda: Day One

TUESDAY SEPTEMBER 9TH

12:25 - 1:15PM

Roundtable Discussions – Technology focus

Designed for candid, peer-level conversation under Chatham House Rule, each roundtable features 2–3 moderators to kick off discussion. All participants are welcome to contribute.

Roundtable 1

Carbon Capture & Utilization:

Turning emissions into assets with scalable CCU tech – what does it take to succeed?

Frederic Clerc
Director Carbon to Value Initiative
and Managing Director
URBAN FUTURE LAB

Roundtable 2

Geothermal Energy:

Meeting demand with an emerging scalable baseload solution

Nour Ghadanfar
Chief of Staff
FERVO ENERGY

Roundtable 3

Turning Waste into Value:

Unlocking Critical Metals and Rare Earths for a Low-Carbon Future

Tomas Villalon
CTO
PHOENIX TAILINGS

Roundtable 4

Magnesium 101: The Future of Metal:

Proving viability and scalability in cost-competitive sectors

Howard Yuh
CEO
TIDAL METALS

Duncan O'Brien
CFO
TIDAL METALS

Roundtable 5

Industrial Energy Storage:

Integrating flexibility, resilience and cost-effectiveness into your model

Zero Cost Carbon:

Reaching \$0 per Ton for Direct Air Capture to enable Gigaton-Scale Carbon Removal

Ethan Cohen-Cole
Co-Founder and CEO
CAPTURE6

Roundtable 6

Hydrogen at Scale:

How can industrial demand, infrastructure capacity, and capital align?

Parker Meeks
CEO
UTILITY GLOBAL

Roundtable 7

From Seed to Scale:

Building Early Foundations for Success

Rhett Smith
VP of Operations
THE ENGINE

1:15 - 2:30PM

Lunch & Networking

2:30 - 2:45PM

Fireside Chat: Life Cycle Analysis as a Strategic Tool for Supply Chain resilience and Risk Mitigation

Michele Demers
Founder and CEO
BOUNDLESS IMPACT RESEARCH & ANALYTICS

Murtuza Marfani
CFO
SYZGY PLASMONICS

2:45 - 3:25PM

Charting the Scale-up Journey Part 2: Series B+ – De-risking and Scale-Up

What it takes to go from pilot to demonstration and attract infrastructure investors

- Exploring the strategic shift from early-stage funding, towards commercialization
- Expanding production capacity and growing a cross-functional team
- Building a pipeline of industrial projects with credible offtake or deployment partners
- Bridging equity, non-dilutive funding, and early project finance to fund scale-up
- Demonstrating a credible path to profitability and a demonstrable long-term commercial model

Leah Ellis
Co-Founder and CEO
SUBLIME SYSTEMS

Shreya Dave
CEO
VIA SEPARATIONS

Parker Meeks
CEO
UTILITY GLOBAL

David Bierman
Co-Founder and CCO
ANTORA

Moderator:

Aisling Carlson SVP
Partnerships and Investor Programs
GREENTOWN LABS

3:25 - 3:50PM

Fireside Chat: Harvesting Value from Unconventional Waters

- Harvesting magnesium from desal brines
- Extracting fresh water and mineral recovery from process waters

Earl Jones
Operating Partner
DCVC

Howard Yuh
CEO
TIDAL METALS

Jim Newman
CEO
AQUAFORTUS

3:50 - 3:55PM

Tech Spotlights

Dave Gersholowitz
Chief Business Officer
QUEENS CARBON

Skylar Bagdon
Chief Commercial Officer
VERDE TECHNOLOGY

3:55 - 4:25PM

Networking Break

4:25 - 4:35PM

Forget the tech showcase. In this session, founders will present live, investor-ready pitches centered around specific industrial decarbonization projects that are already in motion. Each presenter will answer three key questions:

- What problem are you solving – and for whom?
- What traction have you secured – offtake agreements, pilots, industry partners?
- What capital do you need next – and how will it unlock scale? This is a chance to hear how companies are moving from vision to execution: how they've engaged industrial off takers, navigated early project financing, and structured partnerships to deliver the potential of their technology

Main Conference Agenda: Day One

TUESDAY SEPTEMBER 9TH

4:35 - 4:50PM

Fireside Chat: Commercial Scale CapEx, the Missing Link in ClimateTech Due Diligence

- Gain insights from an EPC, uniquely positioned as scale-up partner in climatech, on where the rubber meets the road – FOAK FID or FAIL
- Scaling up from pilot to demo to FOAK is a linear process that can leave investors in the blind, can a progressive FEL approach to forecast commercial scale CapEx be adopted in absence of project definition?

James Shih
Executive Director Business Incubation
FLUOR

Matt Reisdorf
Executive Director Process Technology
FLUOR

4:50 - 5:30PM

Interactive Panel - Cracking FOAK in 2025: Capital, Risk & Lessons from the Edge

First-of-a-kind (FOAK) projects are by their nature, full of risks and complexity but full of opportunity for those who get it right. As regulatory signals stay mixed, and capital gets more selective, only the best-structured, best-supported projects are breaking through. This session brings together those who are actively financing and building FOAK projects in 2025. They'll unpack what's working, and where the sticking points still are, from policy to partners to profitability.

- What new models are emerging to blend venture, public funding, concessional capital, and early infrastructure money?
- De-risking in a volatile market: with creative strategies around offtake and co-investment structures that can drive bankability
- Real-world examples of how teams are navigating permitting, procurement, and delivery risk to make the leap to commercial scale
- Hard-won insights from FOAK deals that closed—or collapsed—over the past 12 months

9:00 - 9:10AM

Chair's Opening Remarks

9:10 - 10:00AM

Panel: De-Risking Tech and Implementing Strategies for Bankability at Scale

From FOAK pilots to full project portfolios, tech leaders and investors must navigate a shifting risk landscape: market volatility, permitting delays, cost inflation, and uncertain policy incentives. This session explores how today's most active players are deploying tools to de-risk technologies, business models, and project pipelines in ways that unlock capital and accelerate scale.

- How venture, growth equity, and infrastructure investors evaluate, and price, different types of risk across stages
- Structuring risk-sharing mechanisms: Use of credit enhancements, blended finance, first-loss capital, offtake agreements, and anchor partnerships to reduce perceived risk
- The role of insurance as a versatile tool for risk mitigation and project finance to advance promising projects that could otherwise fail
- How to build flexible financial structures that can adapt to changing policy timelines, interest rate environments, and supply chain disruption

WEDNESDAY SEPTEMBER 10TH

12:25 - 1:00PM

Devising a Scale-Up Playbook: Lessons, Gaps, and the Path Forward

This discussion brings together leading voices from across the capital stack, industry and tech to distil key insights in:

- What concrete lessons have emerged on tech-commercial fit, capital formation, and industrial partnership from Series A to C+?
- What still needs to be solved—be it offtake risk, FOAK project bankability, or infrastructure investor engagement?
- How can this community synthesize best practices into a working toolkit for startups and their investors
- What can be done to engage generalist investors and reignite powerful partnerships to drive the tech scale up needed?

Lunch and Close of Speaker Sessions

“Decarb TechInvest was a valuable forum that brought together a curated group of stakeholders all tackling the challenge of industrial decarbonization. It was a great place to meet with and build our network of Series B+ investors and connect with potential partners across the CCUS value chain. From insightful panel discussions to helpful new connections, Decarb TechInvest exceeded expectations and I'm looking forward to next year's event.”

2:00 - 4:30PM

Boston Metal — Revolutionizing Green Steel Production (separately bookable)

Join us for an exclusive behind-the-scenes visit to Boston Metal, a leader in sustainable metals production through its breakthrough molten oxide electrolysis (MOE) technology.

The tour will include:

- **Arrival:** A welcome from the Boston Metal team with a brief introduction to their mission and technology.
- **Meet the Team:** Engage directly with company leadership and technical experts driving innovation in green steelmaking.
- **Technology Overview:** Get an inside look at how molten oxide electrolysis works and why it's a game-changer for industrial decarbonization.
- **Guided Tour:** Walk through Boston Metal's R&D and pilot facilities to see their technology in action and understand the scale-up process.

This visit offers a rare opportunity to experience one of the most promising industrial decarbonization technologies firsthand and to engage with the team shaping its future.

SPONSORSHIP OPPORTUNITIES

Join the premier event connecting capital with critical hardtech solutions for industrial transition. Be part of the only event that unites 180+ of the most influential investors, tech disruptors, and strategics focused on industrial decarbonization.

By sponsoring, you will:

-  Position your brand as a leader in industrial decarbonization and the climate tech ecosystem
-  Connect with top-tier investors, startups, and strategics ready to commercialize and deploy critical technologies
-  Showcase your solutions to a curated audience seeking to scale, de-risk, and commercialize hardtech critical technologies
-  Drive deal flow by meeting Series B+ and FOAK-phase startups ready for partnership and investment
-  Gain exclusive insights into market appetite, innovation gaps, and the latest trends shaping the future of industrial decarbonization

Ready to Accelerate Industrial Decarbonization?

Contact our team to discuss tailored sponsorship packages and secure your place at the heart of the ecosystem driving investment and innovation in the world's most CO₂-intensive sectors.

9-10 SEPTEMBER 2025

Boston, USA

Discover Boston: The Host for Decarb TechInvest!

Join us in Boston for the second Decarb TechInvest - where innovation meets opportunity. Boston stands out as the perfect host city for this event, thanks to its strengths:

- **Strong Investment Hub:** Boston is a leader in climate tech venture capital and funding, fuelling groundbreaking advancements.
- **Academic & Industrial Excellence:** Home to world-renowned institutions like MIT and Harvard. Boston offers a rich pool of industry-leading talent and expertise.
- **Proven Commercial Success:** The city boasts a track record of pioneering companies -such as Boston Metal, Sublime Systems, and Mantel, who are shaping the future of industrial decarbonization.
- **Dynamic Collaborative Network:** Boston's dense ecosystem of startups, corporations, and research institutions, supported by partners like GreenTown Labs, drives powerful partnerships and innovative pilot projects.
